### Louisiana Center for Nursing Update

*from Cynthia Bienemy, PhD, RN, Director of the Louisiana Center for Nursing*

Nursing Supply, for the purposes of the Louisiana Center for Nursing, is defined as the number of registered nurses holding an active license to practice as a registered nurse (RN) in Louisiana. The Louisiana Nurse Practice Act requires that an RN renew his/her license every year. The Louisiana State Board of Nursing is the state appointed agency assigned to implement, regulate, and monitor the issuance of a license to practice as a registered nurse in the state of Louisiana.

In 2009, 54,366 nurses held a license to practice as an RN in Louisiana. Of the 54,366 RNs holding a Louisiana license, 46,828 (86%) reported their domicile as Louisiana, while 7,523 (14%) reported home addresses outside of Louisiana. There has been a 14% increase in the number of RNs holding a license to practice nursing in Louisiana since 2005. At the same time there has been a 13.5% increase in the number of RNs residing outside of Louisiana, holding a license to practice in Louisiana. The vast majority of RNs holding an active RN license in Louisiana (76%) reported that they were employed full-time. There has been a 15% increase since 2005 in the number of RNs that are working full-time and a 14% increase in the number that are working part-time.

These findings are in line with national trends, suggesting that the current economic climate in our nation has caused nurses that were not working to return to the workforce, nurses that were working part-time, to seek full-time employment, and nurses that were contemplating retirement, to delay their plans for retirement. The market for RNs, especially new RN graduates, appears to be flooded in some areas of our state and country, while in other areas there continues to be a shortage of RNs. Many experts feel that if we fail to prepare for the return of a more stable economic climate when spouses return to work, when nurses return to part-time instead of full-time positions, and when nurses that have delayed retirement proceed with retirement plans, we will experience the worst nursing shortage since the late 90s. According to Peter Beurhaus (2009), Director for Interdisciplinary Health Workforce Studies at Vanderbilt University, “. . . long-term projections still indicate that the nursing shortage will widen over the next decade as the economy improves and the current workforce retires.”

### The LSBN Annual Report Is Now Available

#### Protecting Your License: Electronic Images of Patients

## Tips for protecting your RN license against allegations of violation of patient confidentiality

Over the past two years the Board of Nursing has received complaints from hospitals, patients and others against nurses who take electronic images and share them on internet sites.

**Did you know that creating and/or sharing electronic images of patients — even their body parts — is a violation of patient confidentiality?** A cell phone image portrays protected medical information about the patient; therefore, creating and/or sharing that information (ex., via My Space) is prohibited just as is verbally disclosing patient medical information.

The Board of Nursing laws that apply to this activity are:

- *Louisiana Revised Statute 37:921 (3)* which states in part that the Board may take disciplinary action upon proof that a licensee or student nurse is unfit or incompetent by reason of negligence, habit or *other cause*.
- *Board Regulation Title 46, Part XLVII, 3405.a.e.* states that *other causes* includes violating the confidentiality of information or knowledge concerning the patient.

Note that, as an employee or agent of a hospital or other entity, you have a duty to follow that employer's policy regarding disclosure of patient information --- which by definition includes electronic images.

This means that if you act outside of your employer's policy guidelines and personally obtain the patient's permission to take an electronic image, you will not exempt yourself from violation of patient confidentiality. This is because you, as an RN, are in a position of unequal power with patients who must put their confidential information in your hands. You are expected to refrain from using that power for your personal reasons --- including creating, sharing or personally asking for consent to take ---- electronic images of patients.

**TIP:** Your duty to protect confidential patient information includes refraining from disclosure of the patient's medical information, *including images of the patient or any body part*. Protect your RN license by protecting your patient's protected information and refrain from taking electronic images of patients.

### Peripherally Inserted Central Catheter (PICC) Insertion and Removal

The Louisiana State Board of Nursing received a petition from a RN PICC nurse with Lafayette General Medical Center on August 28, 2007 requesting a declaratory statement or advisory opinion on nursing practice regarding whether it is within the scope of practice for a specialty trained PICC RN to verify by radiographic confirmation catheter tip placement in the Superior Vena Cava and to authorize use of the catheter prior to the radiologist's validation of the PICC placement.

The petition and research related to the topic was presented and reviewed by the Practice Committee on October 23, 2007, January 22, 2008 and April 22, 2008. On June 11, 2008 the Board determined that rule making would be required and on October 21, 2008 the Board approved a rule change draft with a directive to commence rule making after final approval of the Practice committee.

Notice of Intent concerning the proposed Rule was originally published by the Louisiana State Board of Nursing on January 20, 2009 in the *Louisiana Register* (See LR 35:153-154) and republished on February 20, 2009 in the *Louisiana Register* (See LR 35:341-342) with revisions.

A public hearing was held at the office of the Louisiana State Board of Nursing on March 27, 2009 to hear public comments on the proposed amendments to Louisiana Administrative Code, Title 46, Part XLVII, adding LAC 46:LXVII § 3707. Written comments were invited, received and considered, as were oral comments, views, arguments and information. **Certain of those comments suggested substantive changes.** Revisions to the proposed rule were made. **The rule provides that catheter tip placement must be verified by a physician prior to the initiation of therapy.** A second public meeting was held on December 7, 2009 regarding the modified proposed rule, no further comments were received.

On December 9, 2009 the Board accepted the report to adopt the proposed rule LAC 46:XLVII.3707. Guidelines on IV Therapy to Include PICC Line Infusion and Competencies.

On January 20, 2010 the following rule change was promulgated as LAC 46:XLVII.3707 as follows:

#### RULE

#### Department of Health and Hospitals Board of Nursing

Registered Nurses—Peripherally Inserted Central Catheter (PICC) Insertion (LAC 46:XLVII.3707)

The Louisiana State Board of Nursing has added LAC 46:XLVII.3707, in accordance with R.S. 37:918 and in accordance with the provisions of the Administrative Act, R.S. 49:950 et seq.

The rule, LAC 46:XLVII.3707, defines peripherally inserted central catheter (PICC) lines and provides that registered nurses may insert, secure and remove PICC lines provided certain conditions, including specified training are satisfied. **The rule provides that catheter tip placement must be verified by a physician prior to the initiation of therapy.**

#### Title 46

#### PROFESSIONAL STANDARDS AND OCCUPATIONAL STANDARDS

#### Part XLVII. Nurses: Practical Nurses and Registered Nurses

#### Subpart 2. Registered Nurses

#### Chapter 37. Nursing Practice

#### §3707. Peripherally Inserted Central Catheter (PICC) Insertion and Removal

## Board Notices

### Peripherally Inserted Central Catheter (PICC) Insertion and Removal (Cont...)

A. Definition

*PICC Line*—peripherally inserted central catheters (PICCs) are venous devices used to administer all types of intravenous medications and solutions. PICCs are soft, flexible catheters.

B. Registered nurses may insert, secure and remove central catheters through peripheral venous sites provided that the following conditions are met:

1. documentation of satisfactory completion of a minimum of four hours of study in an appropriate instructional program and verification of employment in a supervised clinical practice on file with the employer;
2. catheter placement is pursuant to a physician or other qualified prescriber's order for the procedure;
3. the procedure is performed according to appropriately established policy and procedure of the health care facility, employing agency and/or physician's office;
4. in view of the proliferation of various catheter products available for placement, the registered nurse must be knowledgeable about the manufacturer's suggestions and precautions concerning the specific catheter product utilized, and should review product information on a frequent basis; and
5. catheter tip placement must be determined by a physician prior to initiation of therapy.

C. In order for a registered nurse to be authorized by the board under this Section, the instructional program shall include the following courses of study:

1. for nurses performing duties to include insertion of PICC lines:
  - a. anatomy and physiology of circulation and fluid balance;
  - b. indications and contradictions for PICC placement;
  - c. complications and management techniques to include potential adverse reactions;
  - d. techniques for placement of PICC lines may include ultrasound techniques;
  - e. techniques for placement of PICC line placement and removal; and
  - f. nursing responsibilities;
2. for nurses performing duties that would include management and monitoring of PICC lines:
  - a. anatomy and physiology of circulation and fluid balance;
  - b. indications and contraindications for PICC placement;
  - c. complications and management techniques to include potential adverse reactions; and
  - d. nursing responsibilities;
3. for nursing performing the duties of PICC line removal:
  - a. techniques for PICC line removal;
  - b. complications and management techniques to include potential adverse reactions; and
  - c. nursing responsibilities.

AUTHORITY NOTE: Promulgated in accordance with R.S. 37:918.

HISTORICAL NOTE: Promulgated by the Department of Health and Hospitals, Board of Nursing, LR 36:64 (January 2010).

**LEGAL DUTY TO NOTIFY THE BOARD OF NAME OR ADDRESS CHANGE**

Every RN with a Louisiana license is responsible for immediately notifying the Board office in writing of any name or address change. Correspondence from the Board, such as licensure renewal, notice of Board Actions printed in The Examiner which may affect the license, as well as disciplinary charges and notice of hearing are mailed to the last known address of the Registered Nurse. The responsibility rests with the licensee to assure that the Board has a current address on file at all times. Failure to properly notify the Board of one's current address can result in a lapsed license, noncompliance with regulations of the Board, or disciplinary action in the nurse's absence. **Correspondence to the last known address is legal notice.**
